

MODEL 400

The 400 strikes a balance between air brushes and high production spray guns. Most often used by automotive painter, the 400 also handles large murals, large RC planes and boats, acrylic rendering, backdrops and applications of gesso or varnish. Made of precision-machined, die-cast aluminum and zinc parts, the Model 400 is assembled, inspected and tested in actual use by our skilled technicians before leaving the factory

Features (400 Detail / Touch-up Gun)

Unique overhead convertible trigger design converts easily to right or left handed use.

Choice of three interchangeable paint tips, air nozzles and needles (Fine, Medium and/or Heavy).
