

L-39

Sport-Scale Electric Ducted Fan ARF

FEATURING
HYPERFLOW™
TECHNOLOGY™
HyperFlow™ ducted fan unit with
Ammo™ in-runner brushless motor.

**MOLDED FROM ADVANCED
AEROCELL™ FOAM!**

AeroCell™

Tough enough to take abuse — light enough
for electric flight — and factory-finished for
stunning presence in the sky!

DUCTED FAN SPEED — SPORT-SCALE STYLE!

The straightforward design of the L-39 fighter makes it an excellent match for R/C model reproduction. ElectriFly's sport-scale version combines extreme brushless motor performance with advanced HyperFlow ducted fan technology — for a wide-open flight envelope that all jet pilots will enjoy.

- Low parts count for fast, easy assembly.
- Strong, lightweight AeroCell™ construction — factory-finished for aggressive fighter jet looks.
- Includes the HyperFlow ducted fan unit with Ammo 20-40-3500 in-runner brushless motor for hyper speeds.

GPMA1869 • Wingspan: 25 in (635 mm) • Wing Area: 141 in² (9.1 dm²) • Weight: 15-16 oz (430-450 g)
Wing Loading: 15.3-16.2 oz/ft² (47-49 g/dm²) • Length: 31 in (780 mm)
Requires: 3-channel radio w/3 micro servos, 25A brushless ESC, 910-1250mAh 11.1V LiPo battery

Magnet-secured hatch covers provide easy access to the battery. There's room to install a wide range of battery sizes.

When you can't be out performing rocketing climbs and high-speed passes, admire your L-39 on this included display stand.

The AeroCell™ Advantage

AeroCell™

AeroCell may be the finest material ever created for electric aircraft! This closed-cell foam delivers the benefits of costly composite construction in a more pilot-friendly, easy building form. AeroCell offers the structural strength and rigidity of traditional structures without building...the weight advantages of foam without the brittleness and breakage... and a smooth, paintable surface that comes out of the box factory-finished and decaled.

The L-39's smooth AeroCell™ surface comes already finished with a military-style camouflage trim.

Main structures are ready for fast final assembly. Without the cost or complexity of many ducted fan jets, the L-39 is capable of blistering speed without sacrificing flight time. It performs well throughout the flight envelope, on power and off.

The HyperFlow ducted fan and Ammo™ brushless motor combination produces impressive thrust and speed.

Decals are also factory-applied and detachable display magnetic armament is included.

Prepare for peak L-39 ARF performance with these recommended accessories!

ElectriFly PolyCharge™ 4 LiPo DC Charger

GPMM3015

ElectriFly Power Series LiPo Batteries:

11.1V 910mAh 20C Deans Ultra (GPMP0605)
7.4V 1250mAh 20C Deans Ultra (GPMP0608)
11.1V 1250mAh 20C Deans Ultra (GPMP0609)

ElectriFly Silver Series 25A Brushless Electronic Speed Control

GPMM1820
