

# 1SQ™

Ready-to-Fly Quadcopter

***Palm-sized  
quad rotor  
flying fun***

The 1SQ is unlike any other quadcopter — and not just because of its compact size. A “TAGS” 3-axis gyro system, combined with 4 independently controlled rotor blades, makes this machine so stable anyone can fly it. It’s very durable, capable of outdoor flight in light winds, and is available Ready-To-Fly and Transmitter-Ready. Both versions come with a LiPo flight battery, charger and extra blades: the RTF also includes a 4-channel 2.4GHz radio with SLT.

- ***TAGS (Triple Axis Gyro Stabilization) stabilizes the heli on three axes***
- ***All onboard equipment is factory-installed for convenience***
- ***Both models include a USB-compatible charger and 1S 150mAh LiPo battery***
- ***The radio included with the RTF features Beginner and Expert modes that let you start flying at the level you’re most comfortable with***
