74078 MODEL CLEANING BRUSH

Dust Be Gone!

This new Model Cleaning Brush has been specially designed to help keep your display models looking sharp. Its fibres not only remove dust and debris, but also static electricity to prevent dust build-up. The long fibres of the main brush makes cleaning around delicate parts easy, while the mini brush lets you get to those hard to reach areas. This brush is not just perfect for maintaining the look of plastic models, it's also great for cleaning die cast models.
